Abstract

 The Android project developed in Android Studio is a comprehensive Student App that offers a range of features to enhance the academic experience. The app includes a profile view that allows students to view and edit their personal information. It also features a mark view where students can view their academic progress and grades. Additionally, the app includes an attendance tracker to help students keep track of their attendance.
Abstract

The app also offers a timetable feature that helps students keep track of their schedules and an exam schedule feature that provides students with up-to-date information on their exams. The Proctor feature enables students to contact their respective exam proctors directly for any queries. The faculty information feature provides students with a list of faculty members along with their contact details.
Modules

- Registration : Student needs to register with their personal details.
- Login : We have two login one for student and another for admin. Both of them should login through their valid credentials.
